

Bacula Developer's Conference

27-28 September 2010
Yverdon-les-Bains
Switzerland

Are you interested in:

- Meeting the Bacula developers in person.
- Learning how we maintain the source code.
- Hearing presentations about Bacula from the developers.
- Learning about and helping define the Bacula roadmap.
- Giving feedback or ideas directly to the developers.
- Learning more about Bacula Systems.
- Hearing from other Bacula developers and users.

If so, you should know that there will be a Bacula Developer's conference in Yverdon, Switzerland (about 57 minutes by train from Geneva Airport) on the 27th and 28th of September. In addition, Bacula Systems will hold an Open House on Sunday the 26th beginning at noon where you can meet most of the Bacula Systems founders and key Bacula developers person.

This conference will be most appropriate for developers and advanced Bacula users, but it is open and free for everyone interested in Bacula. If you are or have been a contributor to the Bacula project, the project may be able to sponsor part of your trip -- please ask.

Sunday 26 September 2010 from 14:00 to 17:00

Bacula Systems Open House. Visit the Bacula Systems offices and meet the Bacula developers and the Bacula Systems founders. Totally informal and optional.

Day 1: Monday 27 September 2010

Presentations by Bacula developers and anyone else who would like to give a formal presentation (30 to 45 minutes)

Tentative program (see agenda for details):

- Protecting an SAP cloud at Swisscom with Bacula
- DassIT new Bacula conf file GUI editor

- Bacula development process
- Bacula Roadmap
- Bweb
- How Bacula Systems supports the project -- Rob Morrison

Day 2: Tuesday 28 September 2010

Presentations:

- Linux Bare Metal Recovery

Topics for discussion:

Informal direct conversations with the developers, planning, organizing, ...

- Using git
- How patches are integrated
- Regression testing
 - CDash regression dashboard

- Release cycle
- Roadmap discussion and your input
- New backup strategies such as deduplication
- How Bacula plugins work
- rpms and how to improve them
- ...

Your input needed:

We are still in the process of organizing the presentations and the time with the developers, so if you are planning to attend and you would like to make a formal presentation, or if you have some particular subjects that you would like us to address, please let us know as soon as possible.

Registration:

Hotel space is somewhat hard to get at Yverdon, so to register for this event, please do so as soon as possible by sending an email to:

isabelle @ baculasystems.com

and include your:

Name, Company, Telephone number, Mobile Telephone number,
Date of arrival, Date of departure, and any special interests you have
for the conference.

In return, Isabelle will send you an email that gives detailed information on available hotels, our location, how to get here, and other useful information for the conference.
